

**STAFF DRESS CODE**

The Board believes that appropriate grooming and dress contribute to the quality of the educational environment. It is important for staff members to set good examples for students. When staff members are providing services to the District, the Board recommends the following guidelines:

1. All staff will exercise good judgment in their choice of professional appearance for work or work related activities taking into consideration the student dress code.
2. Staff members will dress in a manner consistent with their responsibilities.
3. The staff will dress in such a way that it does not disrupt the educational process nor cause a health or safety hazard.

Building administrators shall monitor employee dress and shall have the authority to make decisions to implement this policy and take appropriate action as necessary.

Some activities shall require exceptions to this policy such as field trips, science labs, field days, athletic activities, and special events such as Dollars for Scholars and Jeans Day.
