

## NOTIFICATION FOR SPECIFIC PESTICIDE REGISTRY

Dear Parent, Guardian, or Staff Member,

I am writing about three subjects that can affect children's health in school: pests, pesticides and your right to know.

### Pest Control

Because pesticides pose risks, the school uses an alternative approach to merely applying pesticides. Control of insects, rodents, and weeds at our school focuses on making the school building and grounds an unfavorable place for pests to live and breed. Through maintenance and cleaning, we will reduce or eliminate available food and water sources and hiding places for the pests. We will also routinely monitor the school area to detect pest problems and prevent the pests from becoming established. Some techniques we will use include non-toxic pest monitoring, sanitation, pest exclusion, proper food storage, pest removal and – as a last resort – pesticides. This holistic approach is often called Integrated Pest Management (IPM).

According, we have contracted with Atlantic Exterminating-an IPM Certified Company to implement and administer or IPM program.

### Pesticide Use

Sometimes pesticides use may be necessary to control a pest problem. When that happens, the school will use the lowest risk products available. If higher risk pesticides must be used, notices will be posted at application sites and parents, guardians and staff have a right to know.

### Your Right to Know

Parents, legal guardians, and school staff will be notified of specific pesticide applications made at the school. To receive notification, you must be placed on the notification registry. Notification will be given at least two days before planned pesticide applications. Pesticide application notices will also be posted in school and on school grounds. Notification need not be given for pesticide applications recognized by law to pose little or no risk of exposure to children or staff.

The school also keeps records of prior pesticide applications and information about the pesticides used. You may review these records, as well as a copy of the Pesticides in School's regulation (CMR 01-026 Chapter 27) by contacting our IPM coordinator, Mark Howland, at 625-2490.

If you would like to be place on this registry, please complete and return the enclosed form.

If you have any questions, please contact Mark Howland. For further information about pests, pesticides and your right to know, call the Board of Pesticides Control at 207-287-2731 or visit the Maine School IPM web site at [www.thinkfirstspraylast.org/schoolipm](http://www.thinkfirstspraylast.org/schoolipm)

Sincerely,

Notification for Specific Pesticide Application

MSAD #55

Attn: Mark Howland  
IPM Coordinator

I am a parent, legal guardian or staff member of this school and I want to be notified before specific pesticide applications are made at the school or on the school grounds except the following: 1) non-volatile liquids injected into cracks, crevices or wall voids; 2) non-volatile baits, gels, pastes and granular materials placed in areas inaccessible to students; 3) paints, stains and wood preservatives; 4) disinfectants used for routine cleaning; 5) non-powered applications of ready-to-use general use pesticides to control or repel stinging or biting insects where there is an urgent need to protect the health or safety of a student, staff member or other school occupant; 6) when school is not in session and will not be in session until the re-entry time specified on the pesticide label has elapsed and 7) indoor applications of a pesticide with no re-entry interval specified on its label but entry to the treated area is restricted for at least 24 hours.
